

Lab 3: Practise Exam

1.  **Worth:** 0% (OPTIONAL)
2.  **Due:** Friday Dec 13, end of day
3.  **Late submissions:** N/A
4.  **Submission:** Submitted on LEA.

NOTE: Substantially completing this lab will count towards improving your worst Lab/Quiz grade. This lab will not be graded for correctness but completeness – the more questions you answer, the more your lab/quiz grade can improve.

Instructions

1. Download the Winter 2025 exam answer booklet from LEA
2. Retrieve the Winter 2025 exam questions. Either:
 - [from the Course Website](#)
 - OR, download the Winter 2025 exam question booklet from LEA.
3. **Print** the exam answer booklet. You can use the College printers for this.
4. Complete as many questions as you can (write them in the boxes provided in the answer booklet).
5. Before the deadline, **scan** your exam answer booklet to PDF.
6. Submit your scanned answer booklet on LEA.

Suggestions

First, try writing this final *only with the aid of the [reference sheet](#) you will be provided during the final.*

Then, create a Pycharm project. You can make separate python files for each question. Try coding your solutions to the exam problems – do they work? Try fixing them! Read the [course notes](#) for reference.

If you're having trouble getting your Pycharm code to work, feel free to work with friends, contact me, or take advantage of teacher office (TO BE POSTED ON LEA SHORTLY).

Once you've gone through this process once, try again on another day with only the reference sheet in hand. See if your solutions/understanding have improved.
